

GENERAL PURPOSE LABORATORY CENTRIFUGE MODEL NO. A-5C

A-5C range of laboratory centrifuge is used for the routine work in medical and industrial laboratory. Laboratory centrifuge A-5 are used to separate particles from a solution according to their size, shape, density, viscosity of medium and rotor speed. A-5-C Centrifuge with 0 to 60 min digital timer with step less speed controller. Special features include in A-5C is safety Lid Lock to prevent cover for opening during in motion. A-5C centrifuge body is constructed by mild steel with high quality powder coated finish. This type of machine is accommodating different types and capacities of rotor.
